TMC to collaborate with IIT-KGP for joint programmes

27 December 2017 | News

The primary objective is to promote interaction and collaboration between faculty, medical professionals and students.

Tata Medical Center, Kolkata will soon enter into an institutional collaboration with the Indian Institute of Technology, Kharagpur in education, research and outreach programmes in the field of interdisciplinary medical research and technology.

The programmes which would be jointly developed by both institutions, will see participation from medical practitioners and involve students spending at least one semester in each institute with joint supervision by faculty and scientists of both institutions.

The primary objective is to promote interaction and collaboration between faculty, medical professionals and students of the two institutions to carry out joint academic and research programmes, joint supervision of undergraduate, master's and doctoral students on a reciprocal basis, and collaborative research projects.
