ANSYS announces IIT-B PhD Fellowship Programme

10 April 2019 | News

Fellowships will support groundbreaking research in healthcare

ANSYS, a global leader in engineering simulation, and the Indian Institute of Technology Bombay (IIT Bombay) will accelerate groundbreaking research across healthcare through a newly launched PhD fellowship program funded by ANSYS.

Over five years, ANSYS will fund PhD fellowships to accelerate healthcare research with an underlying social impact.

"ANSYS is supporting the next generation of inventors to sustain continuous growth and innovation in the healthcare sector," said Rafiq Somani, area vice president - India and South Asia Pacific, ANSYS. "Through this PhD fellowship program, we will provide students from IIT Bombay the resources they need to innovate and deliver cutting-edge advancements to India and the rest of the world."

In addition, ANSYS will also fund PhD fellowships to accelerate environmental sustainability, conservation of resources and technology research.
