Hospido.in introduces AI enabled chatbot Cancer Dost

08 January 2021 | News

Hospido.in's new chatbot â??Cancer Dostâ?? is a completely automated AI bot that will give free cancer treatment guidance to patients

Hospido.in, a Gurugram-based tech enabled online platform dedicated to treating cancer patients all over India has announced the launch of Cancer Dost, an AI enabled chatbot for free opinion on cancer around the world

Hospido.in's new chatbot ‘Cancer Dost’ is a completely automated AI bot that will give free cancer treatment guidance to patients and will usher in a new possibility of affordable and accessible cancer guidance that could transform the healthcare landscape globally. India has a poor oncologist to patient ratio and this tool will especially help those in smaller cities to know their possible treatment options.

Commenting on the development, Karan Chopra, Founder, Hospido.in, said, “Artificial Intelligence has given healthcare a massive playground to innovate. With our razor sharp technology, and its integration with AI, we are able to create a product that will give undivided attention to cancer patients free of cost. The world is dealing with the biggest human-crises of all time, and in these desperate times, AI is helping the healthcare industry address the significant backlog.”
