KARAM Industries launches 3 Ply surgical face mask

24 June 2021 | News

Developed with certified IS 16289:2014 standards, the face mask has been designed to offer maximum protection to healthcare workers and consumers at large with comfort for prolonged usage

KARAM Industries has announced the launch of IS certified 3 Ply surgical face mask. The launch of the new product marks KARAM's foray into the surgical mask segment. The certified K-Air mask from KARAM+ (Healthcare range) ensures comfort and ultimate protection. With excellent filtration, the RFM 50 Surgical Face Mask provides complete protection to its customers in the healthcare sector with quality, comfort, and affordability. Developed with certified IS 16289:2014 standards, the face mask has been designed to offer maximum protection to healthcare workers and consumers at large with comfort for prolonged usage.

RFM 50 comes with ultrasonically sealed earloops onto the mask for better strength. The mask is equipped with a pliable yet firm nose clip. The melt-blown fabric ensures excellent bacterial filtration with the inner layer being sweat absorbent and the outer layer is water repellent.

Hemant Sapra, President, Global Marketing, KARAM Industries said, "With the launch of 3 Ply Surgical face mask, we aim to provide maximum comfort and highest protection from viruses and pathogens to the consumers. We're hopeful that our diverse portfolio of high-quality, affordable face masks will simplify our users' mask buying decisions."

In addition to surgical face masks, KARAM Healthcare range also includes RFMH 101, RF 101 – RFH 101 K-Air N95 Disposable Face Masks.
