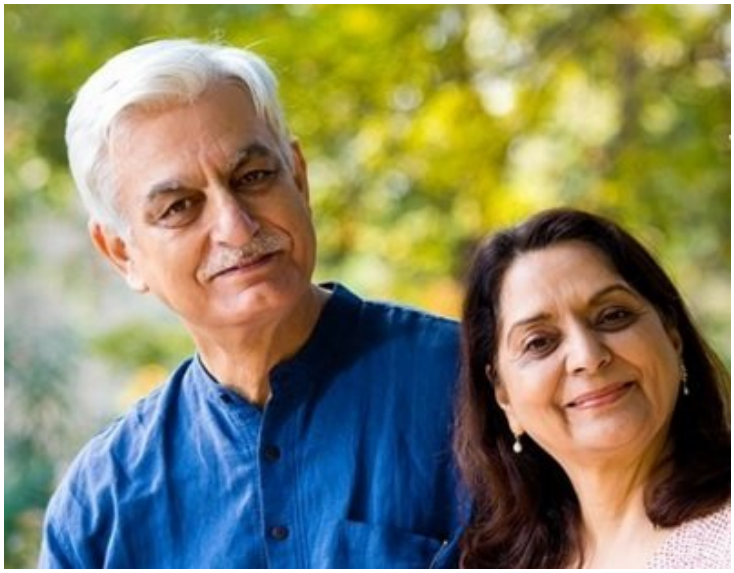
Yodda launches Eldercare services in Hyderabad

28 January 2022 | News

The company will offer emergency, healthcare and convenience services



Yodda Elder Care Technologies has launched operations in Hyderabad. Yodda, a premium parent care company, will now offer emergency services, healthcare services and convenience services to senior citizens living in this city. Yodda Elder Care was launched in 2021 in Pune with a vision of empowering ageing people to live independently.

Yodda's technology platform connects children, parents and elder care staff through a strong system-centric and process-driven ISO certified operational framework. The technology platform is supported on the ground by meticulously trained staff of military veterans. This solution aims to recreate the same emotional, physical and logistical support given by their children with a similar commitment, similar trust and better performance.
