GITAM University, Pfizer start BSc Chemistry course to increase pharma workforce

07 March 2022 | News

The course will begin in 2022

Pfizer Healthcare in association with GITAM (Gandhi Institute of Technology and Management) Deemed to be University, has launched an undergraduate programme in Chemistry (B.Sc. Chemistry Pfizer Programme).

The course which will begin later this year was recently inaugurated to encourage students who have opted for the Pfizer Autonomous Teams (PAT) programme under B.Sc. Chemistry at GITAM Deemed to be University.

The programme has been designed with the help of GITAM faculty to develop qualified professionals to contribute and excel in the pharmaceutical industry. One of the goals of Pfizer is to increase the participation of women in the workforce through the PAT programme and provide avenues to enhance their knowledge, skills and employability in pharma operations.

The university has planned to invest around Rs 15 crore to upgrade the infrastructure facilities and academic reforms.
