Amgen announces opening of new technology and innovation site in Hyderabad

24 February 2025 | News

Amgen India investment totals $200 million through 2025

Amgen has announced the opening of Amgen India, its new technology and innovation site in Hyderabad. The company plans to invest $200 million through 2025, with additional sustained investments planned over the coming years. The site will accelerate Amgen’s digital capabilities through artificial intelligence and data science to further advance its pipeline of medicines, while creating significant opportunities for local talent.

Amgen India is located in HITEC City, occupying approximately 524,000 square feet. Robert A. Bradway, chairman and chief executive officer at Amgen, was joined by Anumula Revanth Reddy, the Chief Minister of Telangana and D. Sridhar Babu, Minister of IT, Electronics & Communications, Industries & Commerce, and Legislative Affairs, Government of Telangana, at the site opening.

Under the leadership of the global organisation, Amgen India will play a pivotal role in advancing innovation by developing and deploying technology and life sciences solutions to accelerate Amgen’s digital capabilities worldwide.
