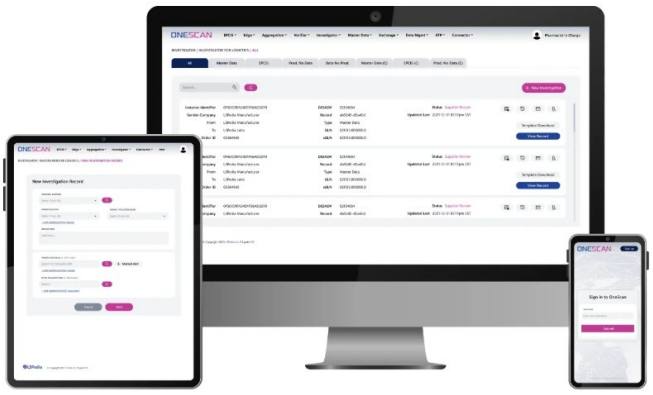
LSPedia and Spring Bio Solution partner to advance pharma traceability in India

20 August 2025 | News

Spring Bio Solution will establish and lead LSPedia's India entity operating from its Mumbai headquarters



LSPedia, a leading provider of pharmaceutical compliance, serialisation, and supply chain software solutions, has announced a strategic partnership with Spring Bio Solution, a top global comparator sourcing and clinical supplies firm based in India.

With more than 14 years of industry experience and a sterling reputation for compliance and regulatory excellence, Spring Bio Solution will play a key role in accelerating LSPedia's global expansion and product adoption.

At the heart of this collaboration is LSPedia's flagship platform, OneScan, the pharmaceutical industry's leading global track-and-trace solution. OneScan empowers pharmaceutical companies to achieve comprehensive global compliance, including serialisation, traceability, exception management, and automated data reporting—all within a single, integrated system.

Through this partnership, Spring Bio Solution will offer OneScan to pharmaceutical manufacturers across India, Europe, Singapore, and other key global markets, enabling them to stay ahead of evolving regulatory demands while increasing operational efficiency.

Spring Bio Solution will establish and lead LSPedia's India entity operating from its Mumbai headquarters. Plans are already underway to extend this presence into Europe and Singapore, further supporting LSPedia's strategic mission to serve pharmaceutical hubs worldwide.
