Fortis Institute of Robotic Surgery opens in Faridabad

24 June 2026 | News

First integrated robotic surgery programme of its kind in the Faridabad region

Committed to advancing surgical excellence through world-class clinical infrastructure, advanced technology, and patient-centric care, Fortis Escorts Hospital, Faridabad has launched the Fortis Institute of Robotic Surgery - a dedicated Centre of Excellence under its ‘Future of Surgery’ initiative.

The Institute represents a significant investment in next-generation surgical infrastructure, integrating advanced robotic platforms, specialised operating environments, and multidisciplinary clinical expertise to deliver highly precise, minimally invasive interventions across multiple specialties.

The Institute brings together highly experienced surgeons across Oncology, General & Gastrointestinal surgery, Urology, Orthopaedics, CTVS, ENT and Gynaecology under a unified, multidisciplinary platform supported by advanced imaging technologies, sophisticated diagnostics, and comprehensive peri-operative care.

A First-of-its-Kind Integrated robotic surgery Programme in the Faridabad Region, the Institute is committed to elevating advanced tertiary care standards for patients across Faridabad and beyond. Its scope extends well beyond clinical delivery. It is designed to serve as a hub for innovation, surgical skill development, and the adoption of emerging technologies, reinforcing Fortis Healthcare's broader vision of advancing the future of surgery through excellence, research, and patient-focused care.
