

Healthureum initiates a blockchain-based healthcare setup

09 February 2018 | News | By Manbeena Chawla

Healthureum's platform is designed on the ethereum-based blockchain using smart contract technology to significantly improve efficiency and interoperability of healthcare services.

Estonia-based health-focused startup Healthureum recently announced a blockchain-based 360-degree ecosystem for administering medical care in a reliable and accurate manner. The startup is keen on strengthening its foothold in the Indian market.

Healthureum's platform is designed on the ethereum-based blockchain using smart contract technology to significantly improve efficiency and interoperability of healthcare services. Blockchain technology will help connect all hospitals on a global scale thereby improving the rate at which information is shared between these institutions. Healthureum guarantees full-fledged transparency and clarity that have been missing till date.

Healthureum operates on the ethereum blockchain using an ERC20 standard to deploy smart contracts for health-related services. Its innovative platform focuses on six core areas to bring widespread efficiency and transparency, and cost savvy healthcare. Healthureum, the latest fin-tech revolution, is going to gift healthcare with a level of standardisation and scalability that has been an alarming concern for years now.
