

OPTIMA pharma offers a glimpse into the future

27 February 2018 | News

Optima Pharma offers a concept for pharmaceutical companies to handle small batch sizes and diverse container types

Smart Solutions for Pharma experts is the Optima Pharma theme at Achema 2018.

Small batch sizes and flexible filling equipment and processes are trending requirements for the pharmaceutical industry.

With the MultiUse platform, Optima Pharma offers a concept for pharmaceutical companies to handle small batch sizes and diverse container types.

Optima Pharma also introduces Comprehensive Scientific Process Engineering (CSPE), a process that generates a timeline from the order to start of production that is safe and efficient.

The freeze dryer CS and the sterility test isolator STISO are two new developments by Optima Pharma and will be displayed at Achema.
