Samsung initiates Smart Healthcare project in Andhra Pradesh

21 March 2018 | News

Samsung has provided advanced and innovative healthcare equipment to the hospital

Samsung India has initiated Samsung Smart Healthcare program at King George Hospital in Visakhapatnam to provide affordable and quality healthcare to financially and socially backward patients.

As part of the program, Samsung has provided advanced and innovative healthcare equipment such as digital ultrasound and digital x-ray manufactured by the company free to select government hospitals across the country.

The Samsung Smart Healthcare facility in Visakhapatnam was inaugurated by G. Srijana, IAS and Joint Collector, Vizag.

Samsung Smart Healthcare is Samsung India's flagship citizenship initiative in the healthcare space.

Samsung Smart Healthcare program aims to support the Government's efforts to benefit communities with limited access to quality healthcare.

With innovative products such as digital ultrasound, digital x-ray and accessories that facilitate healthcare intervention and multiple medical examinations, since 2015, Samsung has collaborated with 16 government hospitals across to country for the Samsung Smart Healthcare program.

Until now, Over 3.5 lakh patients from economically and socially weaker sections of society have benefitted from the Samsung Smart Healthcare program.

Doctors, technicians and radiologists are also trained to handle state-of-the-art diagnostic equipment and software.
