Thompson honors India's most innovative organizations

Thomson Reuters, the world's leading source of information for businesses and professionals, on December 05, 2013 acknowledged India's top innovators at the Thomson Reuters India Innovation Awards 2013. First established in 2007, the Awards recognize the most innovative

academic institutions and commercial enterprises headquartered in India for their spirit of innovation in Research & Development (R&D).

Among the organizations that were awarded at the ceremony were Reliance Industries Limited under 'Hi-Tech Corporate' category; Council of Scientific & Industrial Research (CSIR) in Hi-Tech Academic & Government' category and Glenmark Pharmaceuticals under 'Pharma Corporate corporate category. The National Institute of Immunology (NII) too received the award under 'Pharma Academic & Government' category.

This year's guest of honor at the event was Dr. T. Ramasami, secretary to the government of India, Department of Science & Technology. The ceremony was attended by more than 150 guests comprising researchers, scientists and heads of pharmaceutical and technology companies,

academics, intellectual property (IP) analysts and searchers, and patent examiners.

Commenting on the Awards 2013, Swarup Choudhury, managing director, Thomson Reuters, India said, "In an increasingly

globalized world, innovation is critical for enhancing competitive advantage. We at Thomson Reuters, award companies and academic institutions basis our research and analysis of their work as recorded in Thomson Reuters patent information services." "Our Intellectual Property & Science (IP&S) business drives the innovation lifecycle around the world, enabling the discovery, development and delivery of the world's greatest innovations. Since 2007, we have been presenting the Thomson Reuters India Innovation Awards to recognize innovation and entrepreneurship in India," said Vinay Singh, director, India, Thomson Reuters Intellectual Property & Science.

Singh added, "India Innovation Awards celebrate excellence for continuous innovation and value add in their respective field of expertise and it is an honor to congratulate this year's winners." Commenting on their recognition in the Hi-Tech Academic & Government category, Professor Samir K Brahmachari, Director General, Council of Scientific & Industrial Research said, "CSIR today is globally benchmarked and is recognized as a successful model of post independence India's innovation system that provides globally competitive, affordable technological solutions to diverse sectors, from leather to generic drugs, pesticides to tractors, glass and ceramics to industrial catalysts, and from minerals and metals to advance materials."

"Today New CSIR is full of promise for New India" and marching ahead from generic to genomic medicine and leading the world in open innovation to protection of traditional knowledge with a focus on S&T intervention for the people at the base of the economic pyramid of India," added Professor Brahmachari.

Winner of the Pharma Academic & Government category, Dr Chandrima Shaha, director, National Institute of Immunology, added, We would like to make a difference to the nation by developing innovative technologies in the laboratory through discoveries spawned by basic scientific inquiry and

developing them for use by the society. Our aspirations are to solve daunting problems in health emerging in modern times."
