

Siemens Healthineers opens diagnostics manufacturing unit in Gujarat

09 August 2018 | News

The facility is spread across 3150 square meters, and is equipped with bench-marked manufacturing facility and globally renowned processes and systems for Indian healthcare industry

Siemens Healthcare aspires to become the trusted partner of healthcare providers worldwide. The partner that they can rely on to help drives their clinical excellence, operational efficiency, and profitability.

Siemens Healthineers has started diagnostics manufacturing facility at Vadodara, Gujarat with an aim to help deliver better outcomes to patients and significantly reduce their wait time for results and revisits.

The new state-of-the-art facility is spread across 3150 square meters, and is equipped with bench-marked manufacturing facility and globally renowned processes and systems for Indian healthcare industry.

As a part of skill development initiative, the facility also serves as centre of excellence for training in laboratory diagnostics, point-of-care testing and diagnostic imaging, across South Asia region.

The future ready site has a fully-functional PLM Lab set up for product development and validation.

The manufacturing unit comprises of two product lines namely urine strips; autopak biochemistry reagent and reagent grade water aqualab.

From being pioneers in diagnostic manufacturing, Siemens Healthineers has maintained a high level of quality and reliability in diagnostics operations for over 40 years in India, and has been consistently tracking changes in consumer demands and

met majority of consumer requirements in time.
