

Zydus Cadila launches generic erectile dysfunction drug in US

02 November 2018 | News

The company has launched the tablets in the strengths of 2.5 mg, 5 mg, 10 mg and 20 mg in the US market after receiving the final approval from the United States Food and Drug Administration (USFDA), Zydus Cadila said in a statement.

Drug firm Zydus Cadila has said that it has launched generic Vardenafil Hydrochloride tablets used for the treatment of erectile dysfunction in the American market.

The company has launched the tablets in the strengths of 2.5 mg, 5 mg, 10 mg and 20 mg in the US market after receiving the final approval from the United States Food and Drug Administration (USFDA), Zydus Cadila said in a statement.

The product will be manufactured at the group's formulations manufacturing facility at SEZ, Ahmedabad, it added.

The group has also received the final approval from the USFDA to market generic Ursodiol tablets, 250 mg and 500 mg, which will be manufactured at the group's formulations manufacturing facility at Baddi, Zydus Cadila said.

The Ursodiol tablets are indicated for the treatment of patients with primary biliary cirrhosis, a chronic disease in which the bile ducts in liver are slowly destroyed, it added.

The group now has 226 approvals and has so far filed over 330 abbreviated new drug applications (ANDAs) since the commencement of its filing process.
