Flourishes with flow technology

Crane Process Flow Technologies was established in April 2001 through the acquisition of well-known brands including Saunders, Depa and Revo. Crane Process Flow Technologies specializes in providing solutions to the diversified process industry, through the development, production and distribution of valves, actuation, pumps and related flow components.

The products offered by the company include diaphragm valves, butterfly valves, ball valves, check valves, diaphragm pumps, peristaltic pumps, quarter turn and linear actuation. Over the years, the company in India has gained vital knowledge and experience in many industries including biopharma. Apart from India, the company has offices in the UK, Dubai, Belfast, Italy, Austria, Belgium, the US and Germany. Some of its well-known products and services include center line resilient seated butterfly valves, DEPA air operated diaphragm pumps, Duo-Chek II, ELRO peristaltic pumps, Flowseal high performance butterfly valves, Noz Check, REVO quarter turn actuators, Saunders HC4, and Single Chek I.

43 Tecpharma Systems

Head: **K Pullaiah (CEO)**

Life Sciences Revenue:

Rs 6 crore

Business: Supplier of scientific instruments

Address: Tecpharma House, Plot No.115, Brindavan Estate, Nizampet Road, Kukatpally, Hyderabad-500072, Andhra Pradesh

Tel: +91-40-23061666

Fax: +91-40-23062077

Keeps customers in comfort

Tecpharma Systems is a supplier of the scientific instrumentation to the pharmaceutical industry, and also to drug discovery, life sciences and biotechnology applications. The company reported sales of Rs 6 crore from its life science products in fiscal 2009-10 as against Rs 4 crore the previous year.

The company represents a wide set of manufacturers of instruments and its own innovative systems having a broad set of applications ranging from biomedical, analytical, biotechnology research, clinical research organizations, animal science research and drug discovery. Exclusive association with some of its principals helped Tecpharma to get acquainted with customers all over the country in a short span of time.

The company sells a largest selection of ultra low temperature freezers, refrigerators, incubators, centrifuges, complete range of water baths, stirrers, rockers, vortex mixers, animal lab equipment, animal behavior and physiology equipment and data acquisition systems. Apart from providing quality products at fair prices, the company is working towards providing superior pre and post sales service to keep the customer in comfort.

44 Sisco Research Laboratories

Head: **SK Agarwal (CEO)**

Life Sciences Revenue:

Rs 5.30 crore

Business: Manufacturing and processing of molecular biology reagents

Start-up Year: 1975

Address: No.26, Navketan Indl. Premises, Shanti Nagar, Mahakali Caves Road, Andheri (E), Mumbai-400093, Maharashtra.

Tel: +91-22-42685800

Fax: +91-22-42685801

Operates in niche markets

Sisco Research Laboratories (SRL) is an ISO 9001-2008 and CE approved manufacturing company specializing in manufacturing and processing of molecular biology reagents and chromatographic material for electrophoresis techniques. For fiscal 2009-10, SRL clocked annual revenues of Rs 5.30 crore as opposed to Rs 5.10 crore in fiscal 2008-09. The company also manufactures agaroses and gel filtration media, which are premier products used in the biotech industry. SRL operates in specialized markets of enzyme substrates, proteins, enzymes and HPLC reagents. SRL also produce dehydrated culture media to meet the critical requirements of life sciences industry.

SRL manufactures and markets over 2,200 compounds in different grades and standard pack sizes. The company offers sophisticated and high purity chemicals in bulk and semi-bulk packs to the R&D and production units of various industries, universities and research institutions. It sells DNA markers, ladders and vectors to all the leading institutes and organizations in India and abroad. SRL is the only Indian agent for Senn Chemicals, Switzerland, and it is also the distributor for Amersham Biosciences, UK.
