

Nephroplus acquires DaVita Care India

05 November 2018 | News

NephroPlus will acquire DaVita Care India's network of 22 centres which serve more than 1,700 dialysis patients nationwide

NephroPlus, India's largest dialysis care network and a trailblazer in redefining dialysis care in India announced the acquisition of DaVita Care India, part of DaVita Inc., a Fortune 500® company, and a leading provider of kidney care in India today.

Under the terms of the agreement, which closed today, NephroPlus will acquire DaVita Care India's network of 22 centers which serve more than 1,700 dialysis patients nationwide. With this acquisition, Nephroplus will further strengthen its servicing capacity as the dominant dialysis centre network and will have a presence in 18 states of India with 176 centers across 97 cities.

DaVita Care (India) Pvt. Ltd. owns and operates a network of dialysis and kidney care centers that provide care for acute and end-stage renal disease patients in India. The company offers dialysis services, including in-center and home hemodialysis, peritoneal dialysis, and AV Fistula and AV graft procedures and allied services that include psychological counseling and diet and nutrition advice.
