Unichem Labs gets tentative nod for Tadalafil tablets

12 December 2018 | News

The tablets are used for treatment of erectile dysfunction(ED), signs and symptoms of benign prostatic hyperplasia (BPH)

Pharma major, pleased to announce it has received a tentative approval from the US health regulator for generic Tadalafil tablets used for treatment of erectile dysfunction.

The company has received the tentative approval from the United States food and Drug Administration for its Tadalafil tablets in the strengths of 2.5 mg, 5 mg, 10 mg and 20 mg, Unichem Laboratories said in a filing to the BSE.

The tablets are used for treatment of erectile dysfunction (ED), signs and symptoms of benign prostatic hyperplasia (BPH), Unichem Laboratories said

The product is a generic version of Eli Lilly's Cialis tablets in the same strengths.
