

Inclusion of medical device industry in DTAB subcommittee is a step in right direction: MTal

07 January 2019 | News

Drugs Technical Advisory Board (DTAB) which is a panel under the Union Health Ministry has decided to set up a sub-committee to assess the issues related to proposal for amendment of MDR 2017

Medical Technology Association of India (MTal), which represents research-based medical technology companies having a large footprint in manufacturing and training in India believes that the formulation of DTAB sub-committee to examine proposal for inclusion of compensation in the policy framework on medical devices is a step in the right direction.

Pavan Choudary, Chairman and Director General, MTal said, “The inclusion of Medical Device industry in the subcommittee is a positive step towards having a well-rounded decision on the proposal for inclusion of compensation in the Medical Device Rules. We will work with the expert panel to form a suitable framework on compensation, keeping in mind the interest of the stakeholders.”

Drugs Technical Advisory Board (DTAB) which is a panel under the Union Health Ministry has decided to set up a sub-committee to assess the issues related to proposal for amendment of MDR 2017 to include provisions for compensation in case of injury or death due to malfunctioning of medical devices or if the devices are found unsafe or non-compliant with the conditions of licence.

The committee is headed by Dr. B.D. Athani, Principal Consultant in Directorate General of Health Services (DGHS) and has representatives of the government, AIIMS and Safdarjung Hospitals, Medical devices industry, and consumers.
