

Suven Life Sciences secures Product Patents in Australia and Singapore

17 January 2019 | News

The granted claims of the patents are being developed as therapeutic agents for neurodegenerative disorders.

Suven Life Sciences Ltd. has announced that the grant of one product patent from Australia and one product patent from Singapore corresponding to the New Chemical Entities for the treatment of disorders associated with Neurodegenerative diseases and patents are valid through 2036.

The granted claims of the patents include the class of selective 5-HT₄ and M₁ PAM compounds respectively and are being developed as therapeutic agents for neurodegenerative disorders such as for the treatment of cognitive impairment associated with neurodegenerative disorders like Alzheimer's disease, Attention deficient hyperactivity disorder (ADHD), Huntington's disease, Parkinson and Schizophrenia etc.

"We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for cognitive disorders with high unmet medical need with huge market potential globally" says Venkat Jasti, CEO of Suven.

Suven Life Science is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products, which are first in class or best in class CNS therapies using GPCR targets. Suven has 4 clinical stage compounds, a Phase 2 undergoing SUVN-502, Phase 2 ready SUVN-G3031, Phase 1 completed SUVN-D4010 and SUVN-911.

In addition to these clinical compounds the Company has nine internally-discovered therapeutic drug candidates currently in various stages of pre-clinical development targeting conditions such as ADHD, dementia, depression, Huntington's disease, Parkinson's disease and pain.
