

Quest Diagnostics acquires laboratory services biz of BBPL

13 February 2019 | News

Transaction expands access to diagnostic innovations in clinical and pathology services for patients, physicians and hospitals throughout Missouri and surrounding Midwestern states

Quest Diagnostics, the world's leading provider of diagnostic information services, has announced that it has completed its previously announced acquisition of the clinical laboratory services business of Boyce & Bynum Pathology Laboratories (BBPL), a leading provider of diagnostic and clinical laboratory services in the Midwest.

Through a separate professional services agreement, Boyce and Bynum Pathology Professional Services, Inc. (BBPPS), is now the exclusive pathology provider for Quest Diagnostics clients in Missouri and a preferred pathology provider in the greater Midwestern region. Additional financial terms were not disclosed.

The aim for the transaction is to bring a broader menu of innovative clinical laboratory and pathology services to patients and providers throughout the region. In addition, the relationship will provide patients with access to an expanded network of service centers across the Midwest, for greater convenience.
