Manipal Hospitals Whitefield appoints Dr. Venugopal as Consultant in Neuro surgery

18 April 2019 | News

His special interests are in Neuro oncology, Deep brain stimulation (DBS), Epilepsy surgery, Spinal deformity and Minimal invasive spine surgery (MISS)

Manipal Hospital Whitefield announced the joining of Dr. Venugopal Subramaniam as Consultant in Neursurgery Department of the Hospital.

Having an experience of over a decade post qualification, Dr.Venugopal is having hands-on experience in various subspecialties of Neurosurgery, which includes complex Brain and Spine diseases in both adult and pediatrics.

His special interests are in Neuro oncology, Deep brain stimulation (DBS), Epilepsy surgery, Spinal deformity and Minimal invasive spine surgery (MISS).

Dr. Venugopal said, “Manipal Hospitals Whitefield is focused and committed to quality healthcare at par with International standards. This a great opportunity for me to leverage my expertise and experience to boost up Manipal Hospital’s endeavour in creating a patient-centric System”

With Functional Neurosurgery getting more importance in the area of today’s Neurosurgery, Dr. Venugopal’s academic contribution and interest in research work on Stem cell Transplant for Parkinson’s disease, Deep Brain Stimulation and 3D printing technology for spinal deformity surgeries is an added advantage which can aid patient’s seeking highest order of treatment in these respective disorders.
