

GakSung Global celebrates its India Foundation Day

19 April 2019 | News

GakSung World is providing Low-Level Laser Therapy (LLLT) with the combination of Thermal therapy

GakSung Global recently celebrated its India Foundation Day in New Delhi. Chaired by Cho Je Yun, the Global CMD of GakSung World, the celebration was attended by over 500 Gaksung customers and health facilitators. The customers also experienced the latest Low Level Laser therapies sessions with GakSung World.

Cho Je Yun said, “LLLT has become a synergistic approach in alternative healthcare ensuring the best treatment for all kinds of diseases and health issues. From Musculoskeletal, Cancer, and Brain Injuries to the treatment of tuberculosis, mucositis, migraine, and hair loss, our wide range of LLLT based products have established a successful treatment record.”

GakSung World is providing Low-Level Laser Therapy (LLLT) with the combination of Thermal therapy which is highly accepted and appreciated in European and many other countries. The products are presently being used in the Neurology Department at KGMC hospital in Lucknow, and many other renowned hospitals as well.

The Indian operations of the company are carried out from it's headquarter based in New Delhi under the leadership of Ranjan Ojha.
