

## DocsApp bags recognition with a staggering 580% growth

04 July 2019 | News

### Continues to be India's largest online hospital

DocsApp, India's leading online doctor consultation platform, has been conferred with the coveted "Industry Achievement Award" by Hurun Report, a leading entrepreneurship publishing platform that recognizes the outstanding work done by entrepreneurs and enterprises in India and China. The award was handed over by Sidharth Menda (Owner- CoWrks, RMZ) in the presence of a selected panel of industry leaders, comprising the likes of Ajit Isaac (Owner - Quess Corp), Nithin Kamath (Owner - Zerodha) & Dilip Surana (Owner - MicroLabs). The award ceremony also witnessed the presence of some of India's top start-up founders.

Established in 2015, DocsApp holds the distinction of being one of the first successful online doctor consultation platforms in India. It started its operations at a time when telemedicine was a novel concept in the Indian healthcare space. Over the years, the company has revolutionized the way patients connect with doctors, by providing one-tap access to specialists doctors across the country. With more than 5000 registered doctors onboard, DocsApp offers specialists' services for all age groups in 19 categories including dermatology, gynaecology, sexology, paediatrics, general medicine, psychiatry, weight management and more.

Given the shortage of qualified doctors and with around 97% of specialists practicing in metropolitan cities, DocsApp has helped to bridge the physical distance between patients and specialist doctors through its platform. With its unwavering commitment, to making quality healthcare accessible to all, DocsApp has successfully built its credibility as a brand.

Commenting on their achievement, **Mr. Enbasekar, Co-Founder, DocsApp**, said, "We are truly delighted to have been recognized and felicitated for our work by such a reputed platform. Since the very beginning of our journey, we have been working relentlessly to make quality healthcare accessible to millions of Indians across the country. It gives me immense pride to acknowledge the fact, which DocsApp has emerged as India's most trusted online doctor consultation platform. DocsApp now provides high-quality healthcare to over 2,00,000 patients per month. This award is a testament to the contributions we have made towards the society and it will further motivate us to set new benchmarks."

DocsApp continues to be India's most preferred medical app by registering a whopping growth of 580% (6.8 times) in the last financial year. The fact that over 60% of DocsApp's users are from tier II and tier III cities in India, makes this feat even more

remarkable. The company also ensures the safe delivery of medicines and home pick up of samples for lab tests via partners.
