Beckman Coulter wins recognition for DxH 520 Hematology Analyzer

13 August 2019 | News

Receives Scientists' Choice Award and Named Best New Clinical Product

Beckman Coulter, a global leader in clinical diagnostics, has announced that its small, but mighty DxH 520 hematology analyzer received the Scientists' Choice Award® for Best New Clinical Laboratory Product of 2018. The award was presented by SelectScience® at the 71st AACC Annual Scientific Meeting & Clinical Lab Expo in Anaheim, Calif.

Designed for low-volume laboratories including clinics and physician offices, the DxH 520 builds on the organization's strength in hematology innovation and complements its broad spectrum of hematology analyzers, including the DxH 600 for mid-volume, DxH 900 for large-volume and DxH connected solutions for ultra-high-volume facilities.

"We are incredibly honored and humbled to receive this award, as it speaks to our commitment to advancing healthcare by applying the power of science, technology, and the passion and creativity of our teams to enhance the diagnostic laboratory," said Peter Soltani, Ph.D., senior vice president and general manager of hematology at Beckman Coulter.
