

DataCore to launch global R&D center in India

02 March 2020 | News

Multimillion dollar investments planned for the development of the R&D centre

U.S. based software-defined storage company DataCore has announced that it will be setting up its second largest global R&D centre in Bangalore, India. With an unequivocal commitment to innovation and the development of the next generation suite of solutions, DataCore plans to drive major global R&D efforts out of Bangalore. The Bangalore center will cater to clients across the US and EMEA for now.

Over 1,000 hospitals and *health* systems rely on *DataCore* software-defined storage to simplify management, reduce costs, and provide high-performance storage systems with zero downtime.

DataCore plans to expand the facility into a fully functional centre of excellence over the next 12 months. The company will leverage the IP it has accumulated over the past 20 years to drive its R&D efforts in Bangalore.

With the launch of the centre, DataCore aims to leverage the sizeable pool of diverse and highly skilled talent in India to further its pioneering work in the software-defined storage space.

The company is creating an extensive recruitment plan in the systems and storage domain that will see hiring from India's top educational institutions. It plans to fill lateral roles with its existing talent thereby allowing the hires to capitalise on the opportunities for growth.

It is also creating a disciplined internship program for graduates to leverage its domain expertise, and help them through the transition to skilled professionals.

Commenting on the launch of the R&D centre in Bangalore, Rizwan Pirani, Chief Product Officer & SVP Global R&D, DataCore said, "DataCore is an authority on software-defined storage, at a point in time where organisations all over the world are realizing the importance of software-defined storage. India, and Bangalore in particular, have been the R&D hub for technology companies globally. We see tremendous potential with the impressive diversity of talent in the market, and are committed to making this our second largest R&D center after Florida, in terms of people. We look forward to working with our teams here to spearhead the development of the next generation suite of solutions for our global customers."

The R&D centre in India will be led by Vani Sharma, Center Head India & Vice President – Products, DataCore and will have a full-fledged functional presence that will be operational by the end of 2020.
