DetelPro launches certified infrared thermometer

12 May 2020 | News

DetelPro IR Thermometer comes with a digital sensor and has a temperature range of 32â?? - 42.99â??

DetelPro, the health and hygiene vertical of Detel has announced the launch of its Certified Infrared Thermometer at Rs. 2999 with 1 year warranty while continuing the tradition of launching products at disruptive prices for consumers. The new IR thermometer from the company comes with immediate and precise recording through an infrared sensor with the accuracy up to +- 0.2 celsius. Consumers can purchase the products from Detel for bulk purchase

DetelPro IR Thermometer comes with a digital sensor and has a temperature range of 32â?? - 42.99â??. The device works with no-touch sensors which help in recording the temperature from a distance of 3-5 cm to avoid contact and to reduce the risk of cross-infection. The thermometer comes with LCD display that helps in using the thermometer in dark environment. It also has an automatic power-off function. The company is also working with various channel partners to make the products available in the nook and the corner of the country, including metro and tier 2, 3 cities.

Commenting on the launch, Mr. Yogesh Bhatia, Founder & CEO, Detel says,“At the time of Pandemic, not just hospitals but businesses, organizations, and individual at large need to keep a routine check of temperatures as a precautionary measure to help avoid the spread of the Coronavirus. Keeping the scenario in mind, we have launched the product with non-contact operation and ultra-fast results that will adequately serve the purpose and more.”

“The aim of our brand has always been to be able to provide the best in class product at an affordable price. We have already disrupted the electronics industry in India with our Value for Money products and we wish to replicate the same in PPE Space with our sub-brand DetelPro”

Apart from IR Thermometer, the company has also launched Face Shields, Masks, Gloves, PPE Kits and many more products.
