

Healthium MedTech unveils novel anti-microbial gloves

29 May 2020 | News

The Anti-Microbial gloves are the 3rd Innovative launch for Healthium in the last 6 months

Bengaluru based Healthium Medtech, one of the largest medical device companies in India, has announced the launch of the first of its kind Anti-Microbial Gloves, TruShield.

Manufactured at Kunigal, Karnataka, these Anti-Microbial Gloves (AMGs) are made from a patented technology using a Quaternary Ammonium Compound that kills microbes and provides 99.99% protection for Healthcare professionals (HCPs) and patients up to 8 hours.

The Anti-Microbial gloves are the 3rd Innovative launch for Healthium in the last 6 months. The company had launched Truglyde SN2355, a suture needles combination specially created for COMOC MG, an Innovative surgical technique to manage Postpartum Hemorrhage (PPH), which is one of the largest causes for maternal mortality.

Healthium also launched the largest shoulder range of Arthroscopic devices in India benefitting Arthroscopy surgeons through simplified and functional patented designs. The Company holds 52 patents in India and the U.S.

These gloves have not yet been explored for anti-viral purposes but in the current pandemic scenario, the demand is the leading the makers to look into this aspect also.
