

Milagrow launches advanced duct cleaning robots for healthy air

07 January 2021 | News

This will be useful for facility managers across corporates, factories, hotels, restaurants, airports, healthcare companies, etc

To increase the safety of people working or living in enclosed environments, Gurugram based firm Milagrow has launched two advanced industry-grade duct cleaning robots. Milagrow Hydra & Milagrow Viper. Both the robots help with cleaning accumulated dirt, dust smut, etc in rectangular or round air ducts with a diameter between 100-350mm. This will be useful for facility managers across corporates, factories, hotels, restaurants, airports, healthcare companies, etc.

The latest addition to Milagrow's product portfolio, Hydra is the world's most versatile duct cleaning robot that cleans large and medium-sized rectangular or round ducts between 250-1000 mm in size. It can also climb up to 30 degrees.

Meanwhile, Milagrow Viper is the world's thinnest, lightest, portable, compact, powerful duct cleaner that cleans round and rectangular ducts between 100-350mm. It comes with three PA 66 nylon brushes that have long durability and spins both sides and cleans efficiently without damaging the duct.

Priced at Rs 1,199,000 and Rs 3,99,000 respectively, both Hydra and Viper come with a 1 year comprehensive warranty.

Speaking on the launch, Rajeev Karwal, Founder, Chairman Milagrow Robots, said, "Cleaning and maintaining Air Ducts was a very difficult task for facility managers and the launch of Milagrow Hydra and Viper air duct cleaning robots shall go a long way to make the task safe and also freeing up the time of manpower for higher value-added jobs."
