Suniel Shetty becomes face of O2Cure air purification products in India

04 February 2021 | News

O2Cure provides RGF's (a US-based environmental design and manufacturing company) patented REME with Â PHI-CellÂ® technology

Bollywood actor, entrepreneur & fitness enthusiast, Suniel Shetty enters into a strategic collaboration with O2Cure; an establishment under Zeco Aircon Ltd to introduce their air purification product line to the Indian markets.

O2Cure provides RGF's (a US-based environmental design and manufacturing company) patented REME with PHI-Cell® technology that has been successfully tested by CCMB-CSIR virology lab in India for reduction of SARS-CoV 2 by 97.48 per cent and by Innovation Bio-Analysis lab in the US for reduction of SARS-CoV-2 virus by 99 per cent from air and surfaces. Their products also prevent from other air contaminants like bacteria, viruses, germs, gases, particles, dust, pollen, and other hazardous pathogens.

Excited about the association with O2Cure; Shetty says “Unlike other air purifier brands in the market, these products are really helpful in not only controlling airborne diseases but also neutralising the novel coronavirus (SARS-CoV-2) upto 99 per cent.”

Elated about the collaboration with the Bollywood star; Kartik Singhal, Founder, O2Cure says “We are hopeful to push O2Cure not just as a brand that can neutralise SARS-CoV-2 virus but as a necessity to your homes.”

O2Cure carry’s forward over 3 decades of work in R&D by their parent company Zeco Aircon in air management systems and the use of advanced testing equipment’s enables them to meet the growing need for air filtration solutions for both corporate & individual consumers. The brand is also planning to introduce a new product line in the market that will focus on countering all types of air pollutants from indoor & outdoor air and surfaces.
