

ICICI Foundation to donate dialysis machines for enhancing healthcare infrastructure

30 March 2021 | News

ICICI Foundation will provide these machines to various hospitals free-of-cost

ICICI Foundation for Inclusive Growth (ICICI Foundation), the CSR arm of the ICICI Group, has announced that it will donate over 100 dialysis machines to enhance the healthcare infrastructure in the country.

ICICI Foundation will provide these machines to various hospitals free-of-cost. This initiative is aimed at providing affordable treatment to the lesser privileged across 60 districts in 14 states in the country.

ICICI Foundation is procuring these state-of-the-art imported machines and providing them to the identified hospitals with a four year warranty in order to ensure uninterrupted operations at the dialysis centres.

Speaking on the occasion, Saurabh Singh, President, ICICI Foundation for Inclusive Growth said, "As a step towards promoting healthcare, we are donating over 100 dialysis machines. This will make affordable dialysis treatment available for patients in towns of various districts, closer to their homes. We believe that this initiative will offer conveniences of time and cost saving for the patients, as they no longer have to travel to big cities for dialysis."

This move is a step in the direction to augment the availability of dialysis machines across various states, where the availability of these machines is lower.
