

## Logistics firm StanPlus deploys ambulance ecosystem across Bengaluru

22 April 2021 | News

**The company has tied up with prominent hospitals in Bengaluru**

Having transformed the ambulance services system in Hyderabad, StanPlus is now venturing into the Bengaluru market.

Through its Red Ambulance platform, StanPlus leverages technology to offer premium quality medical response to patients. An independent and democratic company, StanPlus has reduced the response time for ambulances to 14 minutes with its call-to-wheel time resting firmly at an impressive 2 minutes. Bringing these exceptional services to Bengaluru, StanPlus will deploy 100+ vehicles across the entire city.

To make deep inroads within its new market, the company has tied up with prominent hospitals such as Sakra World Hospital, Columbia Asia Hospital, Ramaiah Memorial Hospital, and Fortis Hospital, among others. Through the Red Ambulance platform, these hospitals have already outsourced their ambulance services to StanPlus.

Furthermore, the platform is looking at strategic tie-ups with ancillary companies such as MyGate, Mfine, and mobility platforms such as Yulu, Rapido and Bounce to enable emergency services to their patrons. Fortune 500 companies rely on RedAssist Platform to enable on-demand ambulance & emergency management service. StanPlus currently manages emergency management for over 1Mn employees in India.
