

Motherhood Hospital brings home vaccination facility for children

14 May 2021 | News

The home vaccination facility can be booked by parents in advance and a thoroughly sanitised fully equipped ambulance will be at their doorstep to cater to the immunisation of babies

Motherhood Hospital brings home vaccination facility for children at doorsteps. This unique service is aimed at easing out the burden of parents having to visit the hospital for immunisation of their newborns/infants, thus ensuring seamless and continued immunisation care for children.

The home vaccination facility can be booked by parents in advance and a thoroughly sanitised fully equipped ambulance will be at their doorstep to cater to the immunisation of babies. Since, Motherhood Hospital adheres to strict Covid safety protocols, it is that the frontline workers are fully vaccinated for Covid and sanitisation, disinfectants will be used to ensure zero rate of infection while administering the vaccinations.

Vijayarathna Venkatraman, CEO, Motherhood Hospitals, said, "Our effort to provide an exclusive home vaccination service for kids is to protect them and the parents visiting hospitals for the fear of infections. We are happy to launch this one of kind service across all our centres of Motherhood in India."
