Tattvan launches home care package for COVID-19 patients

24 May 2021 | News

People in Tier-2 and Tier-3 cities is likely to be benefitted

Telemedicine start-up, Tattvan, has launched its COVID-19 treatment package aimed at supporting those patients who are suffering from mild symptoms of coronavirus.

The idea behind launching this home-care package is to assist people in Tier-2 and Tier-3 cities in getting treatment for COVID from the comfort of their homes via teleconsultation. Patients testing positive can visit the franchise clinics to avail the package. The team at the clinic will then be processing the supplies and offering ground support to the patients.

The package involves a franchise partner who will support patients by providing them timely teleconsultation with the expert panel of doctors, tracking of daily vitals and patient counselling in the time of distress. This package will continue to cater to the infected patients till the time they don't test negative.

Ayush Mishra, CEO, Tattvan E-clinics said, "The covid treatment package seeks to help those patients who are showing mild or equal symptoms of Corona to get the advice of doctors from the comfort of their homes. In this package, you will be given online doctor consultation, nurse vital monitoring, covid counselling by Tattvan's patient executive other information related to covid patients can reach out either via the Tattvan Franchise E-Clinics across UP, Bihar and Rajasthan.

Through this extension package, Tattvan seeks to raise awareness about its programmes and the efficiency of telemedicine for people who can't afford to visit large cities anytime they seek medical advice. With the help of Tattvan's Telemedicine Network, health providers and doctors in any of the nearest top hospitals can now provide medical advice.
