DetelPro launches pulse oximeter Oxy10

03 June 2021 | News

The pulse oximeter can be simply clipped onto a fingertip and displays both the oxygen saturation, as well as pulse rate

DetelPro, which entered the healthcare sector in 2020, is now disrupting the market with the most affordable pulse oximeter. DetelPro Oxy10 has an LED display which helps the users to easily check the results. The pulse oximeter can be simply clipped onto a fingertip and displays both the oxygen saturation, as well as pulse rate. It has the normal range of 70-99 per cent for oxygen saturation. Additionally, DetelPro pulse oximeter is equipped with an auto shut-off feature that gets activated after 8 seconds of inactivity. This oximeter, too, has a one button operation feature, so using it will not be a hassle.

Commenting on the launch, Dr Yogesh Bhatia, Founder, Detel said, “We are diligently expanding our inventory PAN India to reach the masses with quality medical supplies and helping the nation fight against corona."

The cost of the oximeter is Rs 299. The company has claimed to have sold around 100,000 units of oximeters across price points so far.

DetelPro is also providing 2 free doctor consultations virtually to only four members of the family on the purchase of an oximeter.
