

Samsung Smart Healthcare centres open in govt hospitals across India

04 June 2021 | News

The centres are equipped with modern Digital X-ray and Digital Ultrasound machines made by Samsung

Samsung India has added Samsung Smart Healthcare centres at government hospitals across the country, as part of its citizenship initiative, helping covid warriors perform faster COVID-19 diagnosis. The centres are in Mumbai, New Delhi, Lucknow, Bangalore, Bhopal, Ahmedabad, Indore, Keylong, Akola, Jamnagar, Shimla and Palakkad.

The centres are equipped with modern Digital X-ray and Digital Ultrasound machines made by Samsung.

“With these new centres, we now have our healthcare equipment in 142 government hospitals across India. We salute the covid warriors who have been working tirelessly over the last year to help people. Our Digital X-ray machines have been able to help them offer faster COVID-19 diagnosis at this time of need,” Partha Ghosh, Vice President, Corporate Citizenship, Samsung India, said.

As part of its citizenship initiatives, Samsung has pledged \$5 million as its contribution to India’s fight against the current surge of COVID-19, providing donations to central and state governments, and boosting the healthcare sector with essential medical equipment for hospitals.
