BTS laboratory certifies Livinguard Masks against Mucormycosis

11 June 2021 | News

Switzerland-based Livinguard launched the masks in India in 2020

Biotech Testing Services (BTS) laboratory in Mumbai has certified Livinguard masks as effective against black fungus (Mucormycosis). Switzerland-based hygiene technology company, Livinguard launched its antiviral face masks in India in 2020 which is noted to be a one-of-a-kind mask that can destroy bacteria and viruses, including SARS-CoV-2 /COVID-19 virus. Livinguard products are ISO 9001:2015 certified.

Sanjeev Swamy, Founder, Inventor and CEO, Livinguard stated, “We are happy with the results, and strongly believe in the unique characteristics of Livinguard masks that will provide users with an unprecedented level of security. People, having comorbidities and who have just recovered from COVID can wear the masks to keep themselves protected against the deadly fungus.”
