

Uttam Group installs 22 PSA oxygen generation plants in Delhi hospitals

14 June 2021 | News

The EN ISO: 13485 certified oxygen generation plants can generate on-demand oxygen

Uttam Group of Companies has installed 22 PSA plants for hospitals spread across Delhi. With a combined capacity of 13000 cubic metre per day, the oxygen generating plants aim to disrupt the way oxygen has been procured and delivered till now. The EN ISO: 13485 certified oxygen generation plants can generate on-demand oxygen by taking in atmospheric air and producing medical grade oxygen in quick and simple steps.

Anand Sharma, VP-Marketing of Uttam Group of Companies, "Uttam has been offering medical oxygen generators for nearly 10 years and when the time came, we were prepared to install them in such a short time. These generators could not have come at a better time. We hope that these generators bring succour to the residents of Delhi."

Delhi CM Arvind Kejriwal in a virtual meet inaugurated the oxygen plants.
