

MIT-ADT University introduces PG Diploma in robotics process automation

19 July 2021 | News

An MoU was recently signed with CiTiS Infotech & InnoWise Global to jointly offer the programme

MIT Centre for Future Skills Excellence, MIT Art, Design & Technology University (ADT) Pune has introduced a new post-graduate diploma in Robotics Process Automation (RPA) from August 2021 academic session. MIT-ADT University has signed a Memorandum of Understanding (MoU) with Pune-based firms CiTiS Infotech & InnoWise Global to jointly offer a PG diploma programme in Robotics Process Automation.

The main intention of this association is to build employable professionals to cater the demand of the ever-emerging global automation industry. The Curriculum for PG Diploma in RPA has been curated, designed, & developed in such a way that may help graduates and working professionals develop their talents with micro-credentials anticipated for future jobs.

The adoption of RPA across multiple global industries such as healthcare, pharma, diagnostic, logistics, etc. is rising at a breakneck speed. A career in RPA is extremely beneficial and profitable. This new technology will undoubtedly provide a large number of job possibilities around the world.

Any graduate with mathematics at Class XII or equivalent is eligible for the eleven-month programme, which is divided into three trimesters with unique internship opportunities for better exposure. The admission announcement with details is available on its official website.
