- Partnered with 30 hospitals in India

- Targeting tier II cities
- Running large R&D budget in collaboration with Jayadeva institute of cardiology, Narayana Health, National Institute of Mental Health and Neuro-Sciences (NIMHANS) in Bengaluru

Founder Speaks-

"Even though remote patient monitoring has been in use in other countries, in India it is still at a nascent stage. According to reports, the Global Remote Patient Monitoring Market is expected to be valued at \$2.14 Billion in 2027 from \$786.4 Million in 2019, registering a CAGR of 14.1% through the forecast period. The COVID-19 pandemic has pushed healthcare practitioners towards remote patient monitoring technologies in India and also globally. The platter of benefits that RPM offers can empower the hospitals in the country to tackle the crisis of healthcare worker shortage and facilitate the best of the healthcare delivery to the patients."

- Mudit Dandwate, Chief Executive Officer, Turtle Shell Technologies, Bengaluru
