BD launches new benchtop cell analyzer to enhance lab research

11 August 2021 | News

BD FACSymphonyâ?¢ A1 Cell Analyzer offers powerful flow cytometry capabilities in a compact design

BD (Becton, Dickinson and Company) has announced the launch of a new benchtop cell analyzer that brings sophisticated flow cytometry capabilities to laboratories of all sizes.

The new BD FACSymphony™ A1 Cell Analyzer is a fluorescence-activated cell analyzer that offers advanced research capabilities in a compact design, which helps improve access to instrumentation for complex scientific research to more labs.

It features BD FACSymphony™ instrument technology with the flexibility to meet a broad spectrum of research needs from small particle research to 16-color immunophenotyping, along with industry-standard BD FACSDiva™ Software for streamlined workflows from system setup to data acquisition and analysis.

The BD FACSymphony™ A1 Cell Analyzer joins the extended family of BD FACSymphony™ Cell Analyzers and Sorters and is an important addition to this comprehensive line up of flow cytometers to make powerful flow cytometry capabilities more accessible to researchers.
