Panacea Infosec India in JV with Healmed Solutions USA launch Panacea Healmed

New Delhi-based cybersecurity consulting firm, Panacea Infosec along with Panacea Bioedge has partnered with Healmed Solutions, a leading mental healthcare technology company from the US, to launch India's first AI-based digital, touch-free, voice-enabled mental healthcare technology platform 'Panacea Healmed'.

Panacea Healmed's mental healthcare assessments introduced for healthcare institutions, corporates, educational institutions and social enterprises in India through its proprietary technology platform, provides individuals with direct access to clinical assessments that support risk and diagnosis, provide an immediate connection to care that allows individuals to self-manage and create responsive coping mechanisms through the delivery of personalised therapeutic support.

The platform provides support around various mental health issues, personalised care pathways and valuable preventive insights for healthcare institutions, corporate and social organisations.

It is currently utilised by employers, therapists and educational institutions and offers a continuity of care programme that effectively blends the supported intervention with technology, AI, and human touch. This is accomplished through a suite of proprietary digital tools that are designed by clinicians and grounded in AI that is proven to positively impact outcomes.
