

India gets new range of oxygen generators with backdrop of impending third-wave

06 September 2021 | News

South Korea-based NF Healthcare launches oxygen generators in India

NF Healthcare, manufacturer and provider of PSA oxygen generators, has launched MOSS 1800F product, with a capacity of producing up to 1000 + LPM of medical graded oxygen (with a purity of 93+-3 per cent), in India.

NF Healthcare, with the support of its South Korea-based parent company, has been in the Indian market for the past two years, supplying Indian hospitals and healthcare centres with four unique products, with varying oxygen output capacity (LPM - litres per minute), designed as per the Indian needs.

The newest entrant to the market, as was launched, is the MOSS 1800F with an oxygen flow rate of 180 LPM or 10.8 Nm³/hour. The USP of the product is that it can be modulated to provide up to 1000 + LPM oxygen and cater to the fluctuating demand of any hospital or medical care centre.

NF Healthcare currently operates through B2B partner channels and has considerable presence in the states of UP, Delhi, Haryana, Rajasthan and all-over North-East India.
