Speech therapy app for stuttering

Inception- 2019

Location- Gurugram

Domain- Digital Healthcare

Founders- Meet Singhal (Chief Executive Officer), Anshul Agarwal (Chief Technology Officer), Harsh Tyagi (Chief Operating Officer)

Total team strength- 14

Total funds raised – NA

Investors- NA

Revenue generated since inception- Rs 75 lakhs

Key Highlights-

- Automating speech therapy
- By far the biggest stuttering therapy app in the world
- Clinical trial at AIIMS and user effectiveness study at Lamar University (US) ongoing
- To build AI-based tools and to give real time feedback to users
- To move beyond stuttering to all other speech disorders.
- Identified various repetitive tasks that therapists have to do which leads to low productivity. Now, building tools to automate many of these leading to increased clinician productivity.
- 60,000+ installs across 155+ countries
- Winner of ZS prize, a Rs 1.5 Cr healthcare innovation programme by ZS

Founder Speaks-

"India has just 4,000 speech therapists to cater to over 60 million people with speech disorders. There is a huge demand supply gap in the field, which is unlikely to be met in the short term by just focusing on increasing the number of clinicians. We feel technology is going to play a huge role in fulfilling the need. We also feel that awareness of speech disorders, and overall value of communication in a knowledge economy is on the rise among the populace. Post COVID-19, people have become very accepting towards the idea of online therapy."

Meet Singhal, Chief Executive Officer, Stamurai, Gurugram
