Advanced Enzyme Technologies (AETL) clocked total sales revenue of 154 crore for FY 2010-11 as compared to 121 crore in 2009-10. The revenue is expected to increase 30 to 35 percent on a year-on-year basis for the next five to eight years. The company operates primarily in four segments, including human health & nutrition, animal nutrition, food processing, and industrial processing. The company is expected to start its European and Chinese subsidiaries soon. More than 50 percent of the company's sales come from its exports to 53 countries. AETL, which had a overhaul in 2009, developed more than 400 unique enzyme products like luicine amino peptidase (exo-peptidase), candida antarctica lipase b immobilized, a full range of hemicellulase and pectinase enzymes and a full range of grain ethenol enzymes. AETL is also the largest manufacturer of serratiopeptidase, having perfected the art of manufacturing the enzyme over the past 15 years.

The company offers services such as clinical trials implementation, laboratory and data management, information technology support, medical affairs assistance, quality assurance and bio analysis. The CRO has more than 640 clinical beds globally, including a 16-bed phase I unit in Ahmedabad, a 12-bed phase I unit in Toronto, Canada, a six-bed phase I unit in Warsaw, Poland. The company also has more than 40 LC-MS/MS systems, a CAP/NGSP accredited clinical laboratory, molecular and microbiological laboratory and a low temperature (2-8 °C, -20 °C and -80 °C) controlled storage facility, to store over 4.0 million samples. Lambda Therapeutic Research has additional facilities in Mumbai, India and Erwitte, Germany and has acquired a pharmacovigilance CRO in UK, named Pharm V Solutions.

Concord Biotech

MD and CEO
Mr Sudhir Vaid

28

Business: Manufacturing of bulk drugs

Start-up Year: 2002

Address: 302, Sakar-III, Opp: Gujarat High Court, Off ITO Circle, Ashram Road, Ahmedabad-380014

Tel: +91-79-27544998, 27543557

Fax: +91-79-27540802

Website: www.concordbiotech.com

Revenue:  126.17 crore

Concord Biotech, a R&D-based company that focuses on fermentation and semi-synthetic based products, achieved a total income of  126.17 crore in FY 2010-11 as compared to  110.07 crore in the previous year. It is the largest producer of penicillin-G amidase enzyme, with a market share of 90 percent. It exports this enzyme to a number of companies in China, Europe and the US. Concord also produces and exports lovastatin and tacrolimus and is also starting the production of simvastatin and pravastatin in its new US-FDA approved facility. It now boasts of having one of the largest numbers of bioreactors in India and has setup a lyophilization facility for sterile bulk biopharmaceutical. It also has a manufacturing facility, spread across 28 acres of land, located at Ahmedabad, Gujarat. In FY2010-11, Concord initiated its CRAM business by setting up of its new R&D facility. The company received award for its outstanding contribution to the healthcare sector at Bangalore India Bio 2011.

Ecron Acunova

Revenue:  124 crore

Themis Medicare (TML) achieved a total turnover of  124 crore as against  90 crore for the year ending March 31, 2010.

TML has a plant located in Hyderabad where lovastatin, simvastatin and other fermentation-based actives are produced.

TML boasts of four state-of-the-art manufacturing facilities at three locations, in Vapi (Gujarat), Hyderabad (Andhra Pradesh) and Haridwar (Uttaranchal). The company has a joint venture partnership with Gedeon Richter (Budapest, Hungary), named Richter-Themis Medicare (India) Private Limited and also has signed a long-term business agreement with Schering-Plough Animal Health Corporation, US (SPAH). Although its first breakthrough product was vitamin B12, TML moved on to manufacture several synthetic API and numerous therapeutics.
