

Startup mHealth raises seed fund for undisclosed amount

07 October 2021 | News

The company plans to utilise the funds to improve the employee wellness platform

mHealth – a community-based employee wellness platform powered by artificial intelligence has recently secured an undisclosed amount in the seed funding round led by India Accelerator. The investment round also witnessed participation from HNIs & Industry veterans such as Govind Rao, Vikram Gupta, Alok Mani and others.

Incepted in 2020, the Delhi-based startup helps corporates in personalising their employee wellness programmes on a single platform. mHealth equips corporates to create focussed groups, fitness activities, employee assistance programmes, care programmes and launch challenges and wellness camps on a single platform.
