

Aster Labs unveils advanced pathology lab in Mangaluru

11 October 2021 | News

Plans to set up 20 satellite labs across the country by mid-2022

Aster Labs has announced the launch of its pathology lab in Mangaluru, located in Guru Deep House, Kadri. The lab is spread across 1500 sq ft and offers more than 2,500 tests ranging from routine to specialised tests.

Aster Labs will offer diagnostics services ranging from routine test investigations like blood tests, urine tests, stool tests, biopsy tests to the more advanced tests on biochemistry, haematology, microbiology, clinical pathology, histopathology, cytogenetics, molecular diagnostics and flow cytometry and will provide trustworthy, reliable, high quality, affordable and accurate reports to the patients consistently.

As a part of its growth strategy and expansion plan. Aster Clinical Lab has already launched one reference lab, six satellite labs and 38 patient experienced centres, spread across Bengaluru and Kerala. Aster Labs will also be looking to launch 12 more satellite labs by the coming months. The company plans to set up 20 satellite labs across the country by mid-2022.
