Trivitron, Diagon- Vanguard launch coagulation range in India

20 October 2021 | News

The new products include the COAG Line automated, semi-automated and POC systems

Chennai-based Trivitron Healthcare has announced the launch of a new line of coagulation analyser products manufactured by Diagon. Trivitron in partnership with Diagon-Vanguard Diagnostics India has announced the introduction of these products for the Indian diagnostics market following the signing of a collaboration agreement between the companies.

The new products include the COAG Line automated, semi-automated and POC systems manufactured by Diagon Hungary for reducing bleeding risk in extensive surgeries, checking the efficacy of haemostatic therapies and anti-coagulant drugs.

Rajesh Patel, CEO (IVD Business), Trivitron Healthcare said, “With this launch of the product line from Diagon, we are looking to broaden the scope and scale of efficacies in patient and clinical management. The range of products will complement Trivitron’s focus on supporting patient management by offering precision in clinical diagnostic fields, such as cardiology, infectious diseases, pathology, biochemistry, as well as inflammatory and autoimmune diseases."
