Founder speaks-

"Globally patients spend \$100 billion per year towards diabetes that can be saved if digital health tools and solutions can offer proactive diabetes management and care coordination. This requires high patient engagement which demands a solution that is useful, usable, safe and trusted by the providers and patients. Such solutions that address proactive disease conditions will improve health outcomes and has the potential to save billions of dollars and millions of lives globally."

- Ravi Kunduru, Founder & Chief Executive Officer, QurHealth, Chennai
