

Wockhardt Hospital, Mumbai Central launches breast clinic

22 October 2021 | News

The clinic will focus on all breast-related ailments and provide an accurate diagnosis

Wockhardt Hospital, Mumbai Central has launched a breast clinic to provide treatment at an affordable cost. The clinic will help women with breast cancer, breast reconstructive surgeries, lesions, pain, lumps (Malignant or Benign), by providing a rapid and accurate diagnosis in one visit.

Dr Shilpa Tatake, Centre Head, Wockhardt Hospital says, “A multi-disciplinary team of doctors will give the most effective treatment, diagnosis, and counselling to the patient. While women need to be aware of the changes they see and feel about their breasts, men too need to be more aware so that they can coerce women for early treatment.”
